

Solid Recovered Fuel – By Stericycle

ALTERNATIVE TREATMENT

Alternative Treatment is the heating of waste to disinfect it, as an alternative to incineration. As part of the alternative treatment process the waste is shredded to render it unrecognisable.

Stericycle Solid Recovered Fuel (SRF)
= 137,636 tonnes
 (recovered from 2011 – 2015)

WHAT DOES THIS MEAN?

*based on an average fuel tank size of 53 litres

1 X BARREL
= 159 litres of fuel
OR 3 x cars*

WHY IS SRF GOOD?

*gigajoule per tonne as per barrel of oil equivalents

SRF Burn Value
= 25 GJ/tonne*

BOE†
= 6.1 GJ/barrel

†The barrel of oil equivalent (BOE) is a unit of energy based on the approximate energy released by burning one barrel (42 U.S. gallons or 158.9873 litres) of crude oil.

Stericycle SRF

98,129
tonnes

=

Energy equivalent
of 402,168 Barrels

OR

Or 1,206,504 cars!

And that is why
we love SRF!
